DATA ENGINEER | AWS CLOUD ETL DEVELOPER | PYTHON • SQL • TERRAFORM

Data engineer and AWS cloud ETL developer with enterprise technology experience supporting cloud-based data pipeline work. Background combines healthcare operations, high-stakes documentation, stakeholder communication, and hands-on technical work across AWS, Python, SQL, Terraform, GitLab CI/CD, and modern data platforms.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript

AWS / Cloud: S3, Glue, Lambda, Athena, EventBridge, SQS, Step Functions, CloudWatch, Glue Data Catalog, IAM

Data Platforms: Databricks, PySpark, Delta Lake, dbt, Redshift, Snowflake

DevOps / Tools: Git, GitHub, GitLab, GitLab CI/CD, Terraform, VS Code, Linux/CLI

Concepts: ETL/ELT, data pipelines, schema validation, data quality, source-to-target mapping, orchestration, logging, error handling, data lake layers

Web / Software: React, Node.js, REST APIs, HTML, CSS

AI Tools: Amazon Q, Kiro, GitLab Duo, GitHub Copilot

PROFESSIONAL EXPERIENCE

Southwest Airlines — Dallas, TX

Data Engineering / AWS Cloud ETL Developer

Junior Technology Associate, Data Engineering Track

2024 – Present

- Contribute to cloud-based data pipeline development and support for commercial data workflows using AWS S3, Glue, Lambda, EventBridge, SQS, Athena, CloudWatch, Glue Data Catalog, Terraform, and GitLab CI/CD.
- Support pipelines that move raw source data into curated, queryable datasets for downstream analytics and business users.
- Support schema enforcement and data quality design for Parquet-based ingestion workflows, including type validation, castability checks, skipped-file handling, logging, and Athena readiness.
- Participate in design and documentation of cloud ETL workflows, including source-to-target understanding, business rule clarification, error handling, and operational support considerations.
- Collaborate with senior engineers, technology leads, architects, and business stakeholders to clarify requirements, investigate issues, document findings, and support delivery.
- Leverage approved AI-assisted development tools including Amazon Q, Kiro, GitLab Duo, and GitHub Copilot to support code understanding, testing, refactoring, documentation, and troubleshooting.

SELECTED TECHNICAL PROJECTS

[Retail Data Lake System Design on AWS](#)

AWS | Terraform | Lambda | S3 | CloudWatch | System Design | Data Lake

- Designed an AWS future-state retail data lake architecture mapping POS, mobile/web, e-commerce, ERP, and CRM sources to real-time and batch ingestion patterns.
- Documented architecture decisions for centralized S3 storage, Bronze/Silver/Gold layers, governance, PII protection, self-service analytics, and advanced analytics enablement.
- Built a Terraform-based AWS proof-of-concept using S3, Lambda, IAM, and CloudWatch to validate JSON events, mask PII, enrich metadata, and route valid/error records.

Baggage Claim SQL Lineage Tool

Python | Streamlit | SQLGlott | pandas | SQL Lineage

- Built a Streamlit application that parses airline baggage-claims SQL and maps output columns back to source tables and fields for lineage analysis.
- Designed the tool to support data lineage, traceability, governance, and easier understanding of complex SQL transformations.

Delta Lake Fundamentals Lab

Databricks | PySpark | Delta Lake | Lakehouse

- Developed a Databricks project demonstrating Delta Lake versioning, time travel, schema evolution, merge operations, and history tracking.
- Created notebook-based examples and documentation explaining how Delta Lake supports reliable lakehouse-style workflows.

CERTIFICATIONS & TECHNICAL TRAINING

AWS Certified Cloud Practitioner | AWS Certified AI Practitioner | Databricks Fundamentals Accreditation | dbt Fundamentals | Certified SAFe® 6 Practitioner

Data Engineer Academy — Data Engineering Bootcamp | 2025 – Present

Python, SQL, PySpark, Databricks, dbt, Snowflake, AWS Glue, data modeling, orchestration, system design, cloud data pipelines

Devmountain — Web Development Program | 2023 – 2024

React, Node.js, Express, PostgreSQL, REST APIs, JavaScript, HTML, CSS

PRIOR HEALTHCARE & OPERATIONS EXPERIENCE

Registered Nurse / Clinical Operations Experience

Emergency Department, Behavioral Health Assessment, Pediatric Home Health

2018 – 2025

- Delivered patient care and clinical documentation in fast-paced emergency, behavioral health, and home health environments requiring prioritization, accuracy, confidentiality, and cross-functional communication.
- Coordinated with physicians, care teams, patients, families, and external providers while developing strong documentation discipline, operational judgment, and stakeholder communication skills that now support technology delivery.

EDUCATION

Texas Tech University Health Sciences Center — Bachelor of Science in Nursing

Collin College — Associate of Science in Nursing

University of Wisconsin–Milwaukee — Bachelor of Science in Biology
